UNKNOWN VESSEL

We are receiving a transmission from the alien vessel!

Do not be alarmed. Archimandrite Zikzak 210-A of the Tinkers; this herald arrives on a mission without violence. Tinkers vessels now delve deeper into hyperspace than ever before. The symmetry is disturbed. It is at this time that we who dwell in hyperspace must come to the surface and impart, and convey... and perhaps interact.

This herald brings a warning: do not descend deeper into hyperspace than your surface kind is meant to dive. Do not defile the anomalies within the great dark. Leave their warp nodes undisturbed. Observe these warnings, and we may interact amicably and productively. Ignore them, and you may reap a foul harvest.

Which will you have?

? Wait... who or what are you?

CLOSE **DISMISS**

UNKNOWN VESSEL

Archimandrite, a strange vessel has entered our territory at Eye of Dzibix. It appears to be similar to the Star Harpy organisms that we have encountered before, but it is of a size and configuration that we have not yet seen.

Hold on... we are receiving a conventional communication signal from the vessel. It is attempting to make contact with us!
